Tab Employment - Terminations

This page is for your information about scheduled or already completed terminations of the employment relationship with this employee.

Recording an employee termination, as well as changing this data or deleting the scheduled termination, is done via the "More" button in the main view of the employee form ("End employment relationship").

Changes to an employee termination recorded in this way can likewise be entered via "More"/"End employment relationship". Information on the entry can be found in the FAQ section under Recording an Employment End in the Employee Form[1].
