Booking mask solo

There is a possibility to call for a special booking mask - booking mask solo - which can be integrated in an existing websites, or started via **Auto-start file**.

The intended purpose of the booking mask solo is to give the user a possibility to perform time bookings.

The link for the booking-window could be as following:

http://webdesk3/webdesk3/ta_doBooking.act?
layouttemplate=blankTemplate&closeAfterBooking=true&resizeToW=500&resizeToH=360&showUser=true&showJourn

The parameters can be defined as following:

URL: ta_doBooking.act

- GET-Parameter:

layouttemplate=blankTemplate --> Heading bar, hide menue tree

closeAfterBooking=true --> after the booking the window will close via a JavaScript

resizeToW=[wert] --> width of the window

resizeToH=[wert] --> height of the window

showUser=true --> User name is displayed

showJournal=false --> Link to the journal is hidden >> reasonable, as it can not be diplayed in a small window

1. http://webdesk3/webdesk3/ta_doBooking.act?
   layouttemplate=blankTemplate&closeAfterBooking=true&resizeToW=500&resizeToH=360&showUser=true&showJournal=false
