Booking mask solo

There is a possibility to call for a special booking mask - booking mask solo - which can be integrated in an existing websites, or started via **Auto-start file**.

The intended purpose of the booking mask solo is to give the user a possibility to perform time bookings.

The link for the booking-window could be as following:

http://webdesk3/webdesk3/ta_doBooking.cact?layouttemplate=blankTemplate&showJournal=false

The parameters can be defined as following:

URL: ta_doBooking.cact (or the URL of the desired booking configuration). If the unconfigured action ta_doBooking.act is called, the settings of the booking configuration (booking reasons, note, ...) are not applied.

- GET-Parameter:

layouttemplate=blankTemplate --> Heading bar, hide menue tree

showJournal=false --> Link to the journal is hidden >> reasonable, as it can not be diplayed in a small window

NOTIZ

The former parameters closeAfterBooking (close the window after the booking), resizeToW / resizeToH (window size) and showUser (display the user name) are no longer supported and have no effect.

1. http://webdesk3/webdesk3/ta_doBooking.cact?layouttemplate=blankTemplate&showJournal=false
