Permission

This request is used to request certain **permissions** from the Time & Attendance system for a specific day (or several days) (example: overtime, evaluation of times outside the core hours, ...).
Since permission requests are also possible for the future, employees can obtain the supervisor's consent in advance by means of a request.

The process can either be started immediately or saved as a draft. You will find a detailed description in the chapter **Application Forms**.

After approval by the supervisor, the overtime worked on that day is also evaluated as overtime in the system, in accordance with the employment contract.
