4.28.6

Release Notes - Webdesk - Version 4.28.6

Bug

- [WD-8489[1]] - Fixed an issue that caused not all role holders of a role to be displayed.
- [WD-12706[2]] - Fixed an issue that caused the valid-until date of roles not to be set correctly when deleting a group to which roles are assigned
- [WD-12714[3]] - Fixed an issue that caused system messages not to display HTML lists correctly
- [WD-12771[4]] - Fixed an issue that caused travel expense requests that were previously created as a simple business trip to be incorrectly validated against themselves
- [WD-12847[5]] - Fixed an issue that caused a message to be displayed that Webdesk was unreachable when the user session expired
- [WD-12903[6]] - Fixed an issue that made it impossible to create a contract type that is assigned to a client
- [WD-12981[7]] - Fixed an issue that made it impossible to create a person in time tracking via the TaPersonConnector and override the entry date at the same time
- [WD-11941[8]] - Improved the Time Tracking tab in HRX so that long field names are now displayed better
