4.30.0

Release Notes - Webdesk - Version 4.30.0

Bug

- [WD-8489[1]] - Fixed an issue that caused not all role holders of a person to be displayed.
- [WD-12714[2]] - Fixed an issue that made it impossible to use HTML lists in system messages.
- [WD-12736[3]] - Fixed an issue in the mobile view where the live chat button covered certain menu items.
- [WD-12771[4]] - Fixed an issue in business trips where trips converted to travel expense reports were incorrectly validated against themselves.
- [WD-12981[5]] - Fixed an issue in the "TaPersonConnector" when a new TaPerson is created and the entry date is set.

New Feature

- [WD-12610[6]] - New configuration to adopt the master record values of the employments from HRX when time tracking is activated for a person. This is done based on the configuration in the action "HRX to TA Synchronisation Configuration".
- [WD-12812[7]] - New job that reduces/adjusts the project time when a break deduction takes place on the respective day.

Improvement

- [WD-12824[8]] - UI improvement for React reports to save empty space.
- [WD-12827[9]] - New tool agent for deleting project times through a request.
- [WD-12827[10]] - Standard lists in HR-Expert (e.g., list of persons, cost centers, etc.) now create export files in the current Excel format (xlsx)
