4.33.0

Release Notes - Webdesk - Version 4.33.0 - September 27, 2021

Bug

- [WD-12870[1]] - Fixed an issue in the JournalV2 export that caused column names not to be displayed correctly.
- [WD-13148[2]] - Fixed an issue in the statistics dashlet in HR-Expert.

Feature

- [WD-12957[3]] - Comments on processes can now contain up to 254 characters.
- [WD-12975[4]] - It is now possible to inherit vehicle assignments (for business trips) and subgroups.
- [WD-13061[5]] - In addition to the creation date, the job "deleteOldWfData" can now also remove processes based on their reference date (the date that relates to the process content).
- [WD-13100[6]] - When comments are made in the correction client, it now also saves the author.
