4.48.1

Release Notes - Webdesk - Version 4.48.1

This Version Includes the Following New Features

- [WD-14248[1]] - Combined Project & Time Correction
- [WD-14569[2]] - React Date Pickers

Corrections Were Made in the Following Program Components

- [WD-14458[3]] - Assignment of permissions for projects
- [WD-14755[4]] - Deletion of persons who are still stored as current assignees in processes
- [WD-12279[5]] - Fixed the display of page navigation in the person search

Improvements for Optimal Use

- [WD-14560[6]] - in the area of creating cost centers in HR Expert
- [WD-14315[7]] - in the area of the GDPR evaluation
- [WD-14810[8]] - The monthly journal now ends exactly with a person's termination date
- [WD-14307[9]] - The summary of account values in the monthly journal is now also displayed for the current month
- [WD-14313[10]] - Improvement of the display of reports on person addresses in HR Expert
- [WD-14358[11]] - Improvement of the display of future weekly programs and part-time percentages
- [WD-14430[12]] - Improvement of the placeholder variable "$toDate" in the out-of-office email for open absence reasons (sick leave notification)

System Changes

- [WD-11070[13]] - Update from Log4J to Log4J2. **Warning:** TaCon log settings are reset to the default as a result. See the 4.48+ section here[14].
