4.50.0

Release Notes - Webdesk - Version 4.50.0 - February 22, 2023

New Features

- [WD-13006[1]] - The list of persons now has a new entry in the context menu (right-click) to switch directly to persons
- [WD-14826[2]] - New "Inverse Flow" mode of the time correction. When this mode of the time correction is enabled, the correction bookings are entered immediately (when the process is created) in the time tracking system. If the process is rejected during the course of the workflow, these correction bookings are reverted.
- [WD-14918[3]] - New evaluation in HR Expert that displays all salaries of persons entered (in HR Expert)

Bug Fixes

- [WD-14605[4]] - Changing the person in the absence client no longer disables the "Save" button
- [WD-14693[5]] - Using the same license plate for multiple vehicles is no longer possible.
- [WD-14911[6]] - The list of key values now also displays linked clients on page 2+.
- [WD-14969[7]] - Buttons in the confirmation dialog of the absence client are now translated correctly

Improvements

- [WD-14264[8]] - Auto-complete fields for searching persons can now also search by full name
- [WD-14676[9]] - Excel exports of evaluations now have the "Expand" button in the header row of groupings
- [WD-14917[10]] - Salaries of persons in HR Expert now have the new option "Payout month"
- [WD-15190[11]] - The display of started time correction processes was improved
