4.55.6

Release Notes - Webdesk - Version 4.55.6 - January 10, 2024

Bug Fix

- [WD-16315[1]] - Fix for an issue in the mobile view that led to incorrect coloring of Saturdays and Sundays in calendar functions.
- [WD-16512[2]] - Fix for an issue in the setting for TaTimeModelService.getTaTimeModels() that affected the cache when using the Correction Client and caused a delay when opening it
- [WD-16513[3]] - Fix for an issue in the caching of permissions that led to permissions being requested too frequently and thus slowed down performance
- [WD-15273[4]] - Fix for an issue caused by the use of DateTools.nowWithNextHourPrecision() in the action PoActionPermissionServiceImpl.hasPersonPermissionForAction() with regard to newly granted permissions. As a result, persons could access this permission as early as 11 p.m. on the day before the permission start
