4.59.1

Release Notes - Webdesk - Version 4.59.1 - February 11, 2025

Improvements

Improvement of UI Components

- [WD-17928[1]] - The "eye" icon for column display in tables is now hidden by default and can be enabled in the configuration.

Improvements in the Tax Configuration Process

- [WD-18186[2]] - In the receipt configuration, it is no longer possible to enable the options manual-vat-tax (regular VAT) and multiple-vat-taxes (multi-VAT) at the same time. If one option is selected, the other is automatically disabled.

Bug Fixes

Correct Display and Saving in User Interfaces

- [WD-17808[3]] - In ptm_editTimeEfforts.act (project time editing form), the TA bookings are now displayed correctly according to the selected person.
- [WD-18269[4]] - The selection of the competence group in po_editClient.act (client editing) is now saved correctly and displayed properly when reopened.
- [WD-18259[5]] - Transferring absence data in ps_editSalaryAccounting.act now works without errors.
- [WD-18290[6]] - The layout for long project names on mobile devices in ptm_editTimeEfforts.act (project time editing form) was optimized to ensure correct wrapping behavior.
- [WD-18270[7]] - Multi-VAT rates of 0% are no longer displayed, even if they were configured.
