4.62.1

Release Notes - Webdesk - Version 4.62.1 - December 16, 2025

Improvements

Project Time Tracking

- [WD-19453[1]] - Significant performance improvement when importing large numbers of projects via the connector link.

Travel Expense Tracking

- [WD-19358[2]] - Optimization of the VAT selection in travel expense tracking for faster data entry.

Bug Fixes

Time & Attendance

- [WD-17463[3]] - Fix for an issue where the group calendar remained blocked after an information dialog was closed.

Reporting

- [WD-19829[4]] - Fix for an error where the Excel export with weekly totals enabled delivered no file or produced empty rows.

User Management

- [WD-19857[5]] - Fix for an error where help texts were no longer clickable after a search.

Interfaces

- [WD-19772[6]] - Correction of the conversion between hours:minutes and decimal values in the data transfer between Personalwolke and IF6020.

Kiosk

- [WD-19852[7]] - Fix for an error that caused the kiosk to stop working after an Axios update.

Performance

- [WD-19839[8]] - Optimization of database queries to improve system performance and reduce server load.

Miscellaneous

- [WD-19792[9]] - New confirmation prompt when booking working hours on weekends or holidays to avoid incorrect entries.
