Personal- und Backendsysteme

- Connection via direct DB access
- Use of external APIs
- use of webs ervices

Webdesk EWP enables the distribution of information within the company over a simple surface. This information can be displayed by different back-end or expert systems. Example: payroll clearing or time management and access systems.

The linking with external systems can be done via direct database access or via external APIs or web services. External content management systems can be integrated via XML or RSS feeds.
