

New Features

Time & Attendance

- [[WD-21477](#)¹] - Introduction of new API endpoints for team queries with a separate, paginated listing of persons and a separate query of the time tracking status.

Improvements

Interfaces

- [[WD-20914](#)²] - Improvement of the overview of the status of active jobs, with runtime and error status displayed on the overview page.

Bug Fixes

Time & Attendance

- [[WD-21870](#)³] - Fix for an issue where inactive or no longer valid persons were also displayed in the search in the attendance table.
- [[WD-21690](#)⁴] - Fix for an issue where time tracking bookings with universal error reasons could fail on some systems.

Project Time Tracking

- [[WD-21852](#)⁵] - Fix for an issue where the hierarchical view in project time tracking did not load and no selection was possible.

Travel Expense Tracking

- [[WD-21832](#)⁶] - Fix for an issue where daily deductions for international trips were no longer taken into account in the 24-hour calculation.

HR Expert

- [[WD-21862](#)⁷] - Fix for an issue where, when a termination was withdrawn, the stored script was not executed, which could leave incorrect vacation balances in place.
- [[WD-15136](#)⁸] - Fix for an issue where document permissions in the payroll process prevented access to generated payroll documents.

User Settings

- [[WD-21839](#)⁹] - Fix for an issue where selection list values could be lost if module texts for the default language were missing.

Mobile App

- [[WD-21869](#)¹⁰] - Fix for a display issue where files and folders in the mobile file explorer did not take up the full screen width.

- [[WD-21860](#)¹¹] - Fix for an issue where uploading attachments failed on iOS devices in the travel expense report and doctor's request areas.

Performance

- [[WD-18834](#)¹²] - Optimization of load times and performance when displaying and editing tasks and approvals.

Other Bug Fixes

- [[WD-21867](#)¹³] - Fix for an issue where uploading .ttf fonts was not possible despite supposedly being supported.
- [[WD-21863](#)¹⁴] - Fix for an issue when using branch names containing a slash, which led to incorrect Jenkins links in the system.

Miscellaneous

- [[WD-21821](#)¹⁵] - Added a new view that displays the historical time tracking configuration (weekly program, part-time factor, daily target times) per person in a clear dialog.
- [[WD-21511](#)¹⁶] - Extension of logging so that changes to daily and weekly programs in time tracking are traceable.
