

4.63.4

Release Notes - Webdesk - Version 4.63.4 - February 24, 2026

Improvements

Project Time Tracking

- [[WD-20232](#)¹] - New function for editing favorites in monthly project time tracking.

Reporting

- [[WD-20268](#)²] - Improvement of the statistics query through the introduction of a polling mechanism to avoid timeouts and display progress in the client.

Bug Fixes

Time & Attendance

- [[WD-20064](#)³] - Fix for an error in the booking correction where canceled bookings were not deleted despite the correction process.

Project Time Tracking

- [[WD-20250](#)⁴] - Fix for an error message in project time tracking that occurred when loading favorites after certain actions.
- [[WD-20055](#)⁵] - Fix for a display error in project time tracking where the booking description field unintentionally expanded when invalid project entries were made.

HR Expert

- [[WD-20251](#)⁶] - Fix for an error in HR Expert where identical confirmation dialogs were displayed multiple times when switching between employment states.
- [[WD-20074](#)⁷] - Fix for an error in the maternity/paternity protection assistant where no new employment state was created.

Interfaces

- [[WD-19979](#)⁸] - Fix for an issue with the transfer of JVM startup parameters (--add-opens) to RMI servers under Java 17.
