

Improvements

Time & Attendance

- [[WD-19229](#)¹] - New function for recording trip itineraries via custom trip segments, with automatic generation of legs and mileage reports.
- [[WD-18027](#)²] - New rule for calculating the international meal allowance in accordance with ARV: from the 15th day, the allowance is reduced by 10% for longer stays.

Performance

- [[WD-19833](#)³] - Improvement of Java compatibility by embedding Nashorn, to enable operation with Java 17.

Bug Fixes

Time & Attendance

- [[WD-19872](#)⁴] - Fix for an error where trip segments from a travel request were lost after conversion into a travel expense report.
- [[WD-18026](#)⁵] - Implementation of the BRKG rule for the domestic meal allowance: from the 15th day, the daily allowance is reduced by 50% for longer stays.

HR Expert

- [[WD-19817](#)⁶] - Fix for an error message when starting a new payroll run, which was caused by a faulty SQL call.

Permissions

- [[WD-19826](#)⁷] - Fix for an error that led to an error message and a blocked user interface when checking permissions for non-existent actions.
