

4.62.1

Release Notes - Webdesk - Version 4.62.1 - December 16, 2025

Improvements

Project Time Tracking

- [[WD-19453](#)¹] - Significant performance improvement when importing large numbers of projects via the connector link.

Travel Expense Tracking

- [[WD-19358](#)²] - Optimization of the VAT selection in travel expense tracking for faster data entry.

Bug Fixes

Time & Attendance

- [[WD-17463](#)³] - Fix for an issue where the group calendar remained blocked after an information dialog was closed.

Reporting

- [[WD-19829](#)⁴] - Fix for an error where the Excel export with weekly totals enabled delivered no file or produced empty rows.

User Management

- [[WD-19857](#)⁵] - Fix for an error where help texts were no longer clickable after a search.

Interfaces

- [[WD-19772](#)⁶] - Correction of the conversion between hours:minutes and decimal values in the data transfer between Personalwolke and IF6020.

Kiosk

- [[WD-19852](#)⁷] - Fix for an error that caused the kiosk to stop working after an Axios update.

Performance

- [[WD-19839](#)⁸] - Optimization of database queries to improve system performance and reduce server load.

Miscellaneous

- [[WD-19792](#)⁹] - New confirmation prompt when booking working hours on weekends or holidays to avoid incorrect entries.
