

4.62.4

Release Notes - Webdesk - Version 4.62.4 - January 5, 2026

Bug Fixes

Time & Attendance

- [[WD-19953](#)¹] - Fix for an error where an unwanted empty field was created when adding a new time tracking field in the client settings.
- [[WD-19867](#)²] - Fix for a display issue in the correction client where table rows and columns were partially shifted or cut off.

Reporting

- [[WD-19936](#)³] - Fix for an error that caused the report “Project Times of My Employees” to display no data when the output format was not preselected.

Performance

- [[WD-19837](#)⁴] - Performance optimization when leaving project time tracking editing, to avoid long load times and missing feedback.

Other Bug Fixes

- [[WD-19938](#)⁵] - Fix for an error that caused the creation of additional fields to fail due to a database constraint violation.
