

4.32.0

Release Notes - Webdesk - Version 4.32.0 - September 10, 2021

Bug

- [[WD-12718](#)¹] - Fixed an issue in business trip requests that caused every processor to be shown that the user had been switched, when the process was started as such a user.
- [[WD-12803](#)²] - Custom Java jobs can now also be used when Webdesk is operated with Java 11.
- [[WD-12852](#)³] - Improved Webdesk startup speed.

New Feature

- [[WD-13000](#)⁴] - It is now possible to insert break intervals on days with bookings using the correction client.
- [[WD-13005](#)⁵] - Comments created by users in the correction client can now be edited afterwards.
- [[WD-13064](#)⁶] - There is now a configuration option requiring at least one attachment to be added in workflow processes.
- [[WD-13004](#)⁷] - The correction client now supports all 4 values of the daily permission "Outside Frame".
- [[WD-12337](#)⁸] - Webdesk now supports the display of hourly absences.

Improvement

- [[WD-12955](#)⁹] - The full name of attachments in business trip requests is now displayed when hovering over the attachment with the mouse.
- [[WD-12989](#)¹⁰] - There is now a validation in employment states that checks whether the current weekly hours exceed the full-time weekly hours.
