

Improvements

- [[WD-18837](#)¹] - A new setting was introduced that allows dashboards and reports to be hidden for HR Expert users who do not have permission for the full view of a client. Instead of the dashboard, the list of active persons is now displayed automatically, and the corresponding menu entries are hidden.

Bug Fixes

- [[WD-19111](#)²] - An error message occurred when changing the month in the correction client. This prevented other users from being opened afterwards.
- [[WD-19112](#)³] - Resetting the password by an administrator failed because an error message occurred when sending the email.
- [[WD-18701](#)⁴] - In the travel expense report, the message "No exportable attachment" was incorrectly displayed after a certain action, even if the current situation was correct.
- [[WD-19108](#)⁵] - Re-entry of an employee in HR Expert was not possible due to an error message.
