

4.11.0

Release Notes - Webdesk - July 16, 2020

Bug

- [[WD-10957](#)¹] - Leaf elements should not have number as first column
- [[WD-11031](#)²] - Travel expense only shows region one day after region validity start
- [[WD-11123](#)³] - Summary value for account when using normal time is invalid
- [[WD-11124](#)⁴] - Columns in ta_getOrgJournal client-side report are not aligned in accordance with the action config
- [[WD-11158](#)⁵] - RecordSpecial names containing a colon will not work correctly for getOrgTravel reports
- [[WD-11172](#)⁶] - Org action handler test: Table not displayed
- [[WD-11311](#)⁷] - Unarchiving Timemodels puts them at the end of the sorting order in lists
- [[WD-11363](#)⁸] - Split up the button labels of archiving and activating buttons for daily and weekly programs

New Feature

- [[WD-6755](#)⁹] - Additional dynamic fields need to be assignable to a set of clients
- [[WD-10012](#)¹⁰] - Integrate Matomo into HRX Vaadin application

Task

- [[WD-11041](#)¹¹] - Legislation Improvements
- [[WD-11057](#)¹²] - Fix Jest tests on webdesk-ta-websdk
- [[WD-11118](#)¹³] - Remove cocoon dependency from JSON providers for react-report table
- [[WD-11198](#)¹⁴] - I18n Fix For Legislation Master Data

Improvement

- [[WD-11050](#)¹⁵] - Allow embedded database for dockerized webdesk by setting environment variable
- [[WD-11051](#)¹⁶] - In the action configuration, it can now be set that the display is rendered in the frontend.
- [[WD-11141](#)¹⁷] - Improve NPM build artifacts
