

Improvements

Improvement of UI Components

- [[WD-17928](#)¹] - The "eye" icon for column display in tables is now hidden by default and can be enabled in the configuration.

Improvements in the Tax Configuration Process

- [[WD-18186](#)²] - In the receipt configuration, it is no longer possible to enable the options manual-vat-tax (regular VAT) and multiple-vat-taxes (multi-VAT) at the same time. If one option is selected, the other is automatically disabled.

Bug Fixes

Correct Display and Saving in User Interfaces

- [[WD-17808](#)³] - In `ptm_editTimeEfforts.act` (project time editing form), the TA bookings are now displayed correctly according to the selected person.
- [[WD-18269](#)⁴] - The selection of the competence group in `po_editClient.act` (client editing) is now saved correctly and displayed properly when reopened.
- [[WD-18259](#)⁵] - Transferring absence data in `ps_editSalaryAccounting.act` now works without errors.
- [[WD-18290](#)⁶] - The layout for long project names on mobile devices in `ptm_editTimeEfforts.act` (project time editing form) was optimized to ensure correct wrapping behavior.
- [[WD-18270](#)⁷] - Multi-VAT rates of 0% are no longer displayed, even if they were configured.
