

4.59.2

Release Notes - Webdesk - Version 4.59.2 - February 13, 2025

Improvements

Configurable Export Restrictions

- [[WD-18276](#)¹] - A new setting was added to disable the export options (PDF, Excel, CSV, print) in the journal as long as the journal entry has not been approved. This option is configurable per customer.

Bug Fixes

Bug Fixes in Journal and Absence Modules

- [[WD-18219](#)²] - The display of correction comments in the absence client now works without errors.
- [[WD-18202](#)³] - When embedded on the welcome page, the journal no longer shows toolbars or controls.
- [[WD-18221](#)⁴] - The color of time corrections in the journal was reset to the original vivid blue in light mode.
- [[WD-17448](#)⁵] - Changing existing "mappings" for allowance calculations now works correctly.

Technical Bug Fixes

- [[WD-18305](#)⁶] - Fixed a problem with the Gensync dependency that prevented the release build.
- [[WD-15792](#)⁷] - The loading spinner was unified so that it looks the same on iPhone/Safari as on other devices.
