

Bug Fixes

- [[WD-18434](#)¹] - The separatorFileConnector now correctly reads data from CSV files on the local disk again. The problem occurred after updating to version 4.59.
- [[WD-18383](#)²] - String parameters in report definitions are no longer incorrectly set as optional parameters of type PoLaborContract.
- [[WD-18398](#)³] - Missing booking times in the Excel export of the booking list (ta_getOrgJournal.cact) are now exported correctly.
- [[WD-18400](#)⁴] - Unclear values in the "Booking Durations" column in the journal are now displayed correctly.
- [[WD-18439](#)⁵] - Fixed SQL errors that prevented absence requests from being started.
- [[WD-18287](#)⁶] - The colors for weekends and holidays in the PDF and print export of Journal V2 are now displayed correctly.
- [[WD-18411](#)⁷] - Negative balances in the ListDetailTemplate of the JournalApproval system process are now displayed correctly.
- [[WD-18419](#)⁸] - The approver information in the journal approval process now correctly shows the actual approver and no longer incorrectly shows the employee themselves.
