

## R3.7.5

---

The following is a list of tickets exported from our release management system Jira and assigned to the release described:

### Bug

- [[WD-1130](#)<sup>1</sup>] - Stopwatch must change customer when project is changed
- [[WD-1593](#)<sup>2</sup>] - Projecttime-booking field "project" is not wide enough
- [[WD-1596](#)<sup>3</sup>] - Projekttime / ptm\_doProjectTimeBooking: Flag "verrechenbar" is not set automatically
- [[WD-1597](#)<sup>4</sup>] - getOrgTravel: Hiding of orgstructures does not work
- [[WD-1608](#)<sup>5</sup>] - Problems calculating max working time after holiday (easter monday)
- [[WD-1615](#)<sup>6</sup>] - Display correct error-message when booking fails on time-mobile APP
- [[WD-1621](#)<sup>7</sup>] - Validation for overlapping is not working
- [[WD-1642](#)<sup>8</sup>] - PoManageFileTransfer: Hibernate exception about query of TmTravelConnector
- [[WD-1650](#)<sup>9</sup>] - WdTravel: Stacktrace in Workflowlist / Processdetails
- [[WD-1651](#)<sup>10</sup>] - Exception in CalendarTimeRangeRepairer
- [[WD-1655](#)<sup>11</sup>] - NPE exception when trying to access a travel from the travelFolder
- [[WD-1667](#)<sup>12</sup>] - Regression: CalendarIntervalRepairer swallows parts of AbsenceEntry intervals with open end

### Improvement

- [[WD-1531](#)<sup>13</sup>] - CheckMaxWorkingTime: Possibility to define absence reasons where a notification should be sent
- [[WD-1611](#)<sup>14</sup>] - Possibility to get number of days with a given absence code for a specified time period
- [[WD-1654](#)<sup>15</sup>] - Missing Error message when server not available and current action is stateless
