

R3.8.1

The following is a list of tickets exported from our release management system Jira and assigned to the release described:

Bug

- [[WD-1558](#)¹] - Different icons for actions in responsive
- [[WD-1992](#)²] - Open the highlighted menu folder on reload
- [[WD-2142](#)³] - Personalwolke Webdesk doesn't recognize available "master records" correct
- [[WD-2224](#)⁴] - Wrong customer choosable in project time booking
- [[WD-2256](#)⁵] - NPE in Travel-Validation
- [[WD-2278](#)⁶] - Exception when trying to create new Project and choosing parent directly (without using tree)
- [[WD-2336](#)⁷] - Exception on Executing \$resetPassword in Connector
- [[WD-2356](#)⁸] - SaxParseException when trying to edit editRebookingsV2 action configuration
- [[WD-2357](#)⁹] - ta_editRebookingsV2.act - problem with validation on non-rendered field
- [[WD-2360](#)¹⁰] - getOrgProcessInstances contains unnecessary block for from/to dates
- [[WD-2364](#)¹¹] - Regression in Calendar export as PDF/Excel
- [[WD-2377](#)¹²] - Define hr-expert licencing
- [[WD-2416](#)¹³] - Summary is active by default for some field types in reports

Improvement

- [[WD-2300](#)¹⁴] - Refactoring organigram to MVP: bringing all presentation logic from view classes to presenter and introduce a model

New Feature

- [[WD-2341](#)¹⁵] - Extend ta_getCalendar.act with additional columns to display holiday entitlements and accounts: fieldname with date

Task

- [[WD-2170](#)¹⁶] - New licence for READ-ONLY HRX Users, correct Licence Check for normal HRX Users
- [[WD-2302](#)¹⁷] - Set parent reference into a newly generated organigram bean
