Time Tracking in HR-Expert

If time tracking is to be used, you can **check** "***Activate time tracking***", and the fields required for it are thereby activated.

Field name	Field type	Description
Start of time tracking	Date field	Date field with date picker; no time bookings can take place before this date
TA ID	System field	Assigned automatically by the system after saving
Weekly program	Dropdown	Required field; a configurable selection list is stored
Part-time (%)	Text field	Required field, to reduce from 100% (full working time) if applicable

After saving, fields matching these entries appear, which can also be edited.
