4.47.0

Release Notes - Webdesk - Version 4.47.0

New Features

- [WD-14370[1]] - The dashboard can now also display details of processes
- [WD-14371[2]] - The dashboard now also displays the possible actions for processes
- [WD-14406[3]] - New time correction mode in which it is possible to completely overwrite days
- [WD-14409[4]] - New time correction option that automatically loads existing bookings on days
- [WD-14310[5]] - New filter for actions in the "Open Tasks" list
- [WD-14298[6]] - New monthly view for editing project times
- [WD-14295[7]] - 2 new columns for the monthly journal that show information on the duration of bookings/the sum of bookings per day

Bug Fixes

- [WD-10434[8]] - Fixed an issue in the display of icons in currencies
- [WD-10892[9]] - Fixed an issue in the naming of a column in the role assignment
- [WD-11371[10]] - Fixed an issue with booking in the past when a lot of time passes between opening the page and booking
- [WD-11780[11]] - Fixed a UI issue in the user settings
- [WD-13163[12]] - Fixed an issue in the calculation of vacation entitlement when the part-time factor was used
- [WD-13735[13]] - Fixed an issue that caused help texts to disappear after saving actions
- [WD-14003[14]] - Fixed an issue in the new client-side OrgJournals that prevented very large (>100 MB) evaluations from being run
- [WD-14135[15]] - Fixed an issue in the calendars that caused the column header not to be correctly aligned
- [WD-14153[16]] - Fixed an issue in the "Birthdays and Anniversaries" evaluation that caused the months to be sorted alphabetically
- [WD-14154[17]] - Fixed an issue in the calculation of the average salary in HRX
- [WD-14212[18]] - Fixed an issue in the business trip expense report that caused the overnight allowance not to be calculated correctly
- [WD-14336[19]] - Fixed an issue in evaluations when no result exists
- [WD-14361[20]] - Fixed an issue in the GDPR evaluation that caused the duration of employments not to be displayed correctly
- [WD-14417[21]] - Fixed an issue in the Excel export of evaluations
- [WD-14446[22]] - Fixed an issue in the monthly journal that caused the short journal option not to work
- [WD-14449[23]] - Fixed an issue in group calendars that incorrectly indicated that users have no Groupware configuration
- [WD-14457[24]] - Fixed an issue when editing existing projects
- [WD-14474[25]] - Fixed an issue in the display of the journal on the welcome page
- [WD-14486[26]] - Fixed an issue that made it impossible to delete the first attachment of a process

- [WD-14491[27]] - Fixed an issue in the display of the annual calendar in the TA dashboard
- [WD-14558[28]] - Fixed an issue that caused the out-of-office function not to be activated correctly when an absence with a follow-up absence reason existed
- [WD-14616[29]] - Fixed an issue in project time evaluations

Improvements

- [WD-14355[30]] - Improvement of the display of booking comments
- [WD-12948[31]] - The PDF export of evaluations now displays the header row on every page
- [WD-13823[32]] - Improvement of the readability of receipt values in business trip expense reports
- [WD-14205[33]] - Performance improvement of the login process
- [WD-14329[34]] - Improvement of caching in the correction client
- [WD-14339[35]] - UX improvement of some filter fields: it is now possible to show all entries
- [WD-14429[36]] - Improvement of email forwarding with Office365: changes in the user settings are now synchronized immediately
