Ptm Cost Object Effort Connector

This connector serves to import or export project efforts assigned to cost objects.

Therefore, the following fields should be mapped and connected:

activityShortName	Refers to the activity that shall be stated in the project booking
costObjectForeignId	Foreign key/ID for the connection of the cost object to third-party systems
costObjectName	Name of the cost object whose assigned project efforts shall be imported or exported
CustomerShortName	Shortname of the customer (if given) that the assigned project time refers to
day	The date, for which project efforts assigned to the cost object shall be imported/exported
effortUid	Uid of the to-be-assigned project effort
employeeId	ID of the employee who performed project time efforts assigned to the cost object
projectCode	Project code of the project whose efforts are to be assigned to the cost object
timeAmountInMinutes	Time in minutes - project effort time that should be assigned to the cost object
timeAmountInMinutesOriginal	Planned time in minutes allocated to this project on this cost unit
timeEffortComment	Comment to the project effort booking assigned to the cost object
