

General

This article describes the steps required to install a **Microsoft SQL Server 2016 Express Edition**. Webdesk needs it for the permanent storage of data records.

Installation

Installation Window 1

Double-clicking the exe file starts the installation process.

After a very brief extraction, a window opens with the following options:

- Basic
- Custom
- Download Media

Select

Basic

Accept the license terms by clicking Accept

Installation path: confirm the preset path by clicking Install

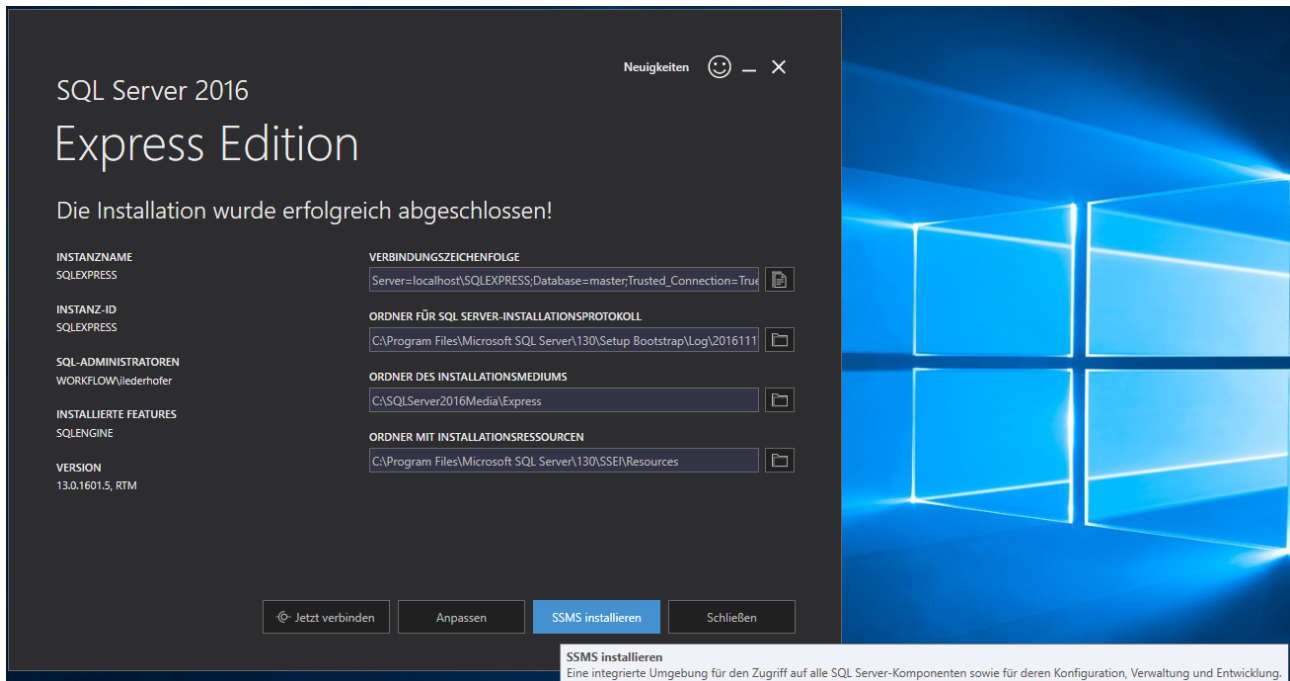

SQL is installed

After the installation, this window shows a series of prefilled file paths and a few buttons in the lower area:

- Connect Now (opens a command prompt)
- Customize
- Install SSMS
- Close

In the **Windows services**, check whether the SQL Server service is running; yes

Clicking **Install SSMS** opens a page in the browser with the link to download SQL Server Management Studio 16.5.

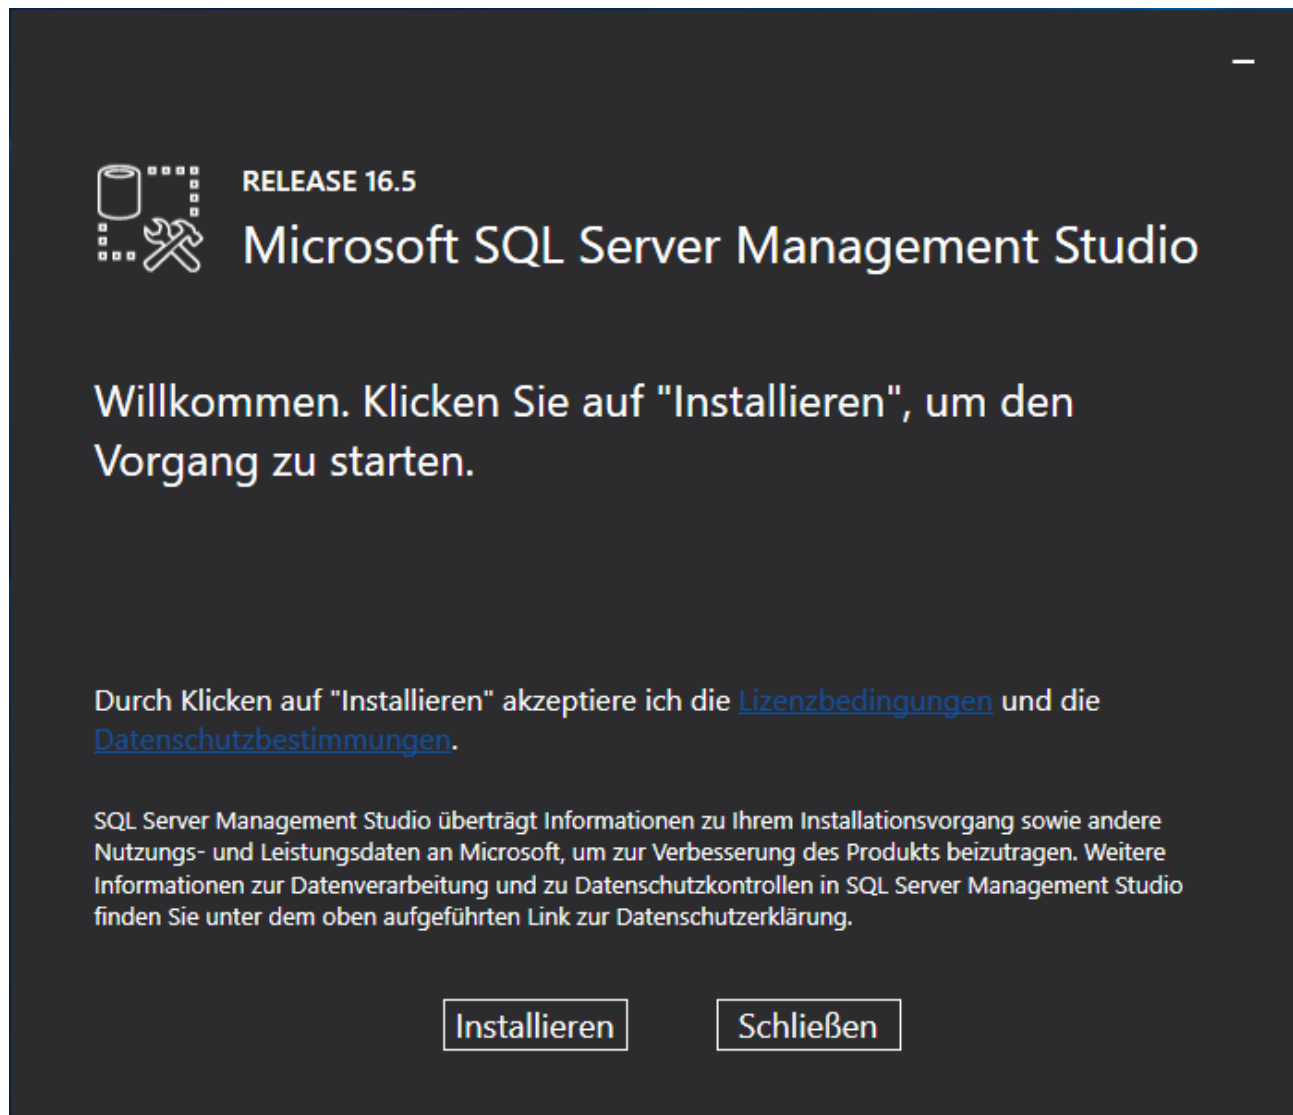

Minimize the previous installation window

Installation Window 2

Double-clicking SSMS-XXX.exe starts the installation

The license and privacy terms appear in the installation window --> **Install**

After the installation, the **Close** button appears

Installation Window 1

Open the minimized installation window and click **Customize**

"**Include SQL Server product updates**" is checked, then continue

Setup files are installed

Installation rules: the status of the installation so far is displayed --> continue

Installation type: select "Add features to an existing instance of SQL Server 2016", then continue ("Perform a new installation of SQL Server 2016" creates a second instance and causes problems)

☐ SQL Server 2016 neu installieren
Wählen Sie diese Option, wenn Sie eine neue SQL Server-Instanz oder freigegebene Komponenten installieren möchten.

☒ Features zu einer vorhandenen SQL Server 2016-Instanz hinzufügen
SQLEXPRESS
Wählen Sie diese Option, wenn Sie einer vorhandenen SQL Server-Instanz Funktionen hinzufügen möchten. Beispielsweise können Sie der Instanz, in der das Datenbankmodul enthalten ist, Analysis Services-Funktionen hinzufügen. Die Funktionen innerhalb einer Instanz müssen derselben Edition angehören.

Installierte Instanzen:

Instanzname	Instanz-ID	Funktionen	Edition	Version
SQLEXPRESS	MSSQL13.SQLEXPRESS	SQLEngine	Express	13.0.1601.5
<Freigegebene Ko...		SSMS, Adv_SSMS		13.0.16000.28
