Webdesk Update

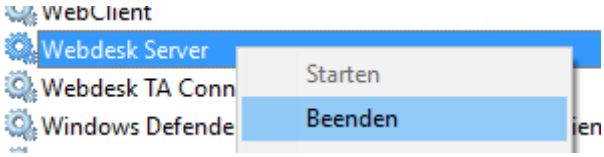

General information

This article describes the steps required to upgrade an older version of the Web Desktop to a Webdesk 4.x.

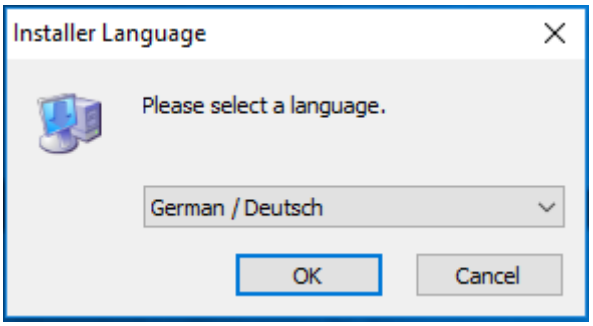

> WARNUNG
>
> Older Webdesk versions than version 3.8 need **first an update to latest 3.8.x**, before a seamless update to 4.x is possible!

> NOTIZ
>
> Webdesk is available in a 32-bit or 64-bit version.

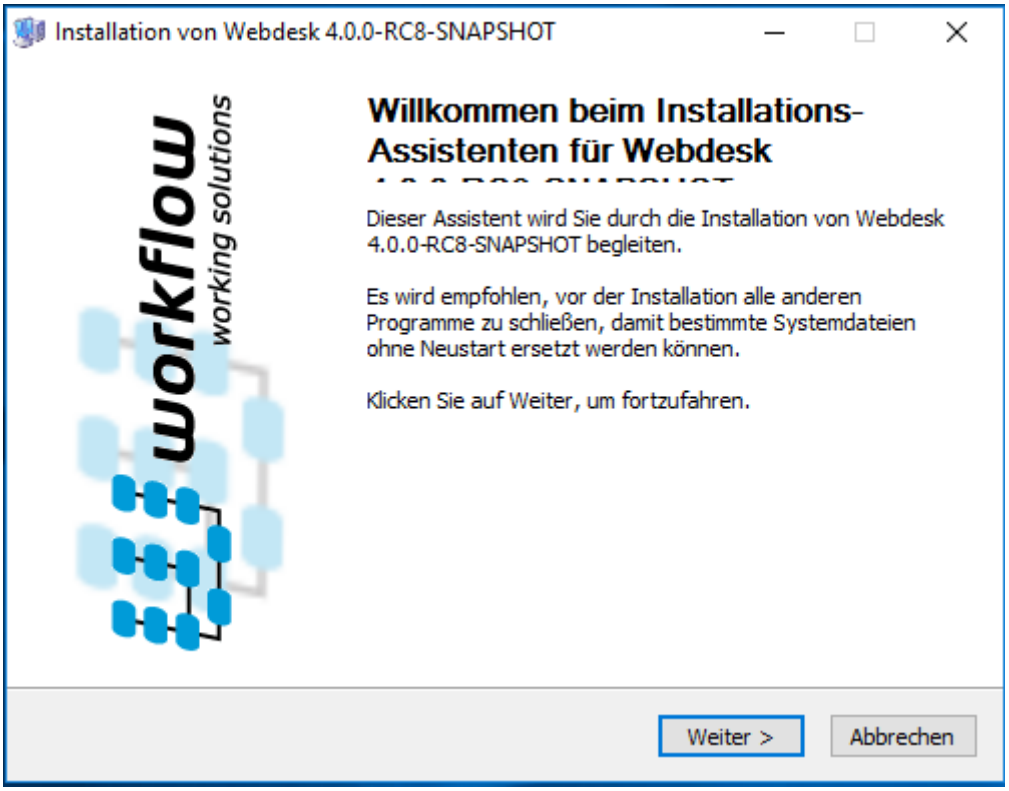

Steps in detail

- Quit the Webdesk server service in the Windows services
- 

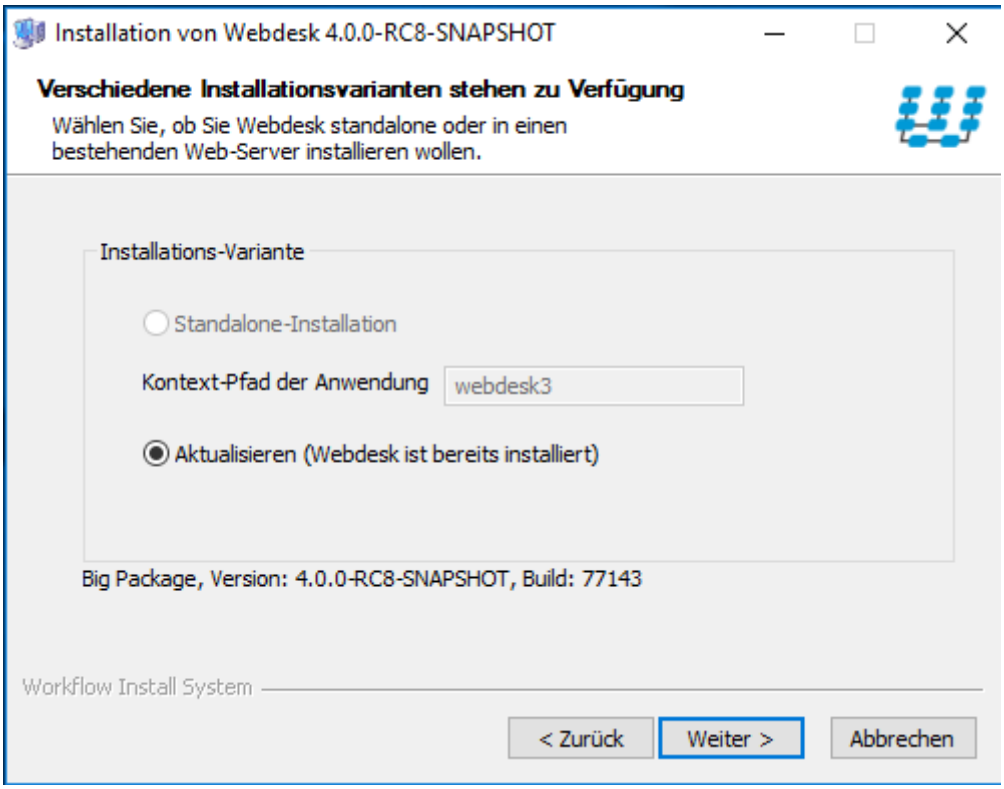

- Double-click the file setup-xxx-xxbit.exe
- Choose your language

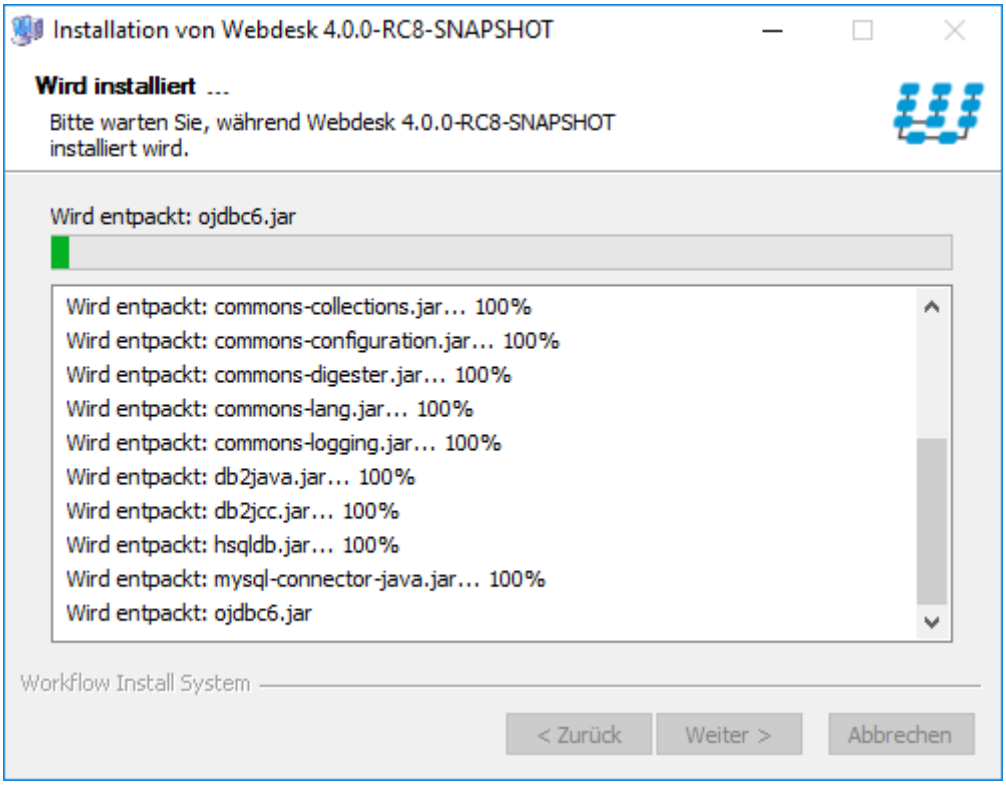

- Welcome screen appears, Next

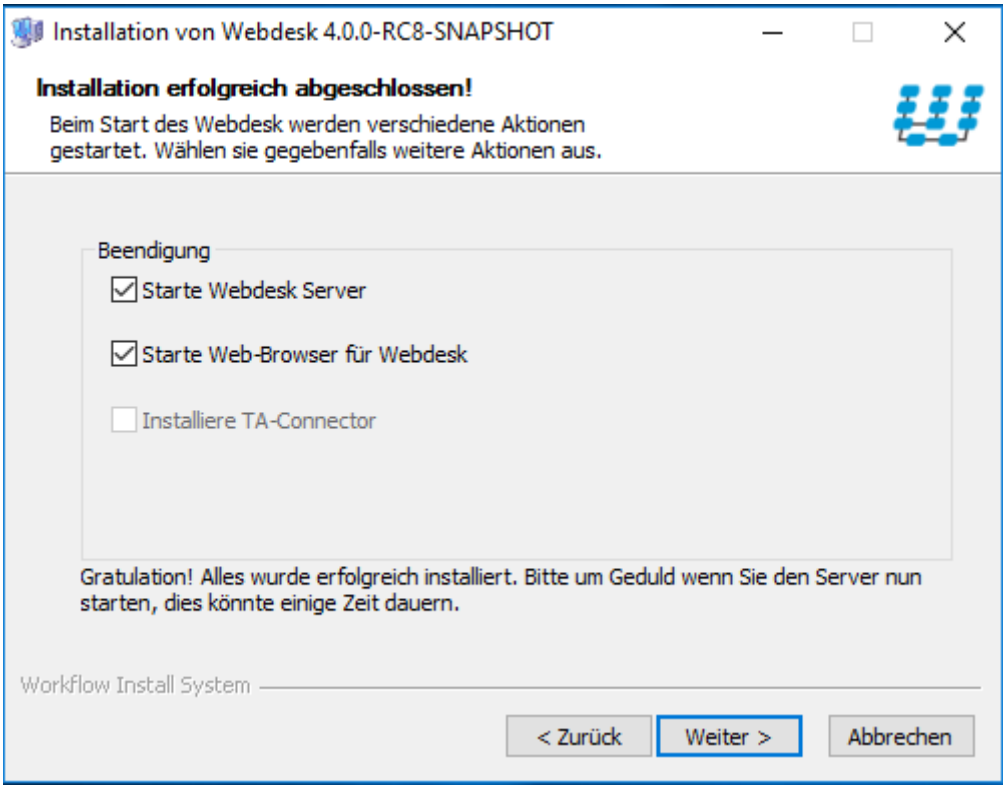

- Installations-Variante: Update (Webdesk is allready installed) is checked, next

- the Update gets done

- Installation completed successfully!
  "Start Webdesk" und "Start Web-Browser for Webdesk" are checked, next

- Complete the installation with Finish

- At the same time, the web browser opens a window with the Webdesk in it
