Statistics

The stastistic provides a monitoring tool for executive staff, offering an overview over optional (individually parametrized) time accounts, such as development of balance accounts or balance of overtime hours.

It is possible to show the actual account balance, as well as the average value and the total sum of all months.

The selection of the requested units/departments is operated either via the organigramm or the favourits-list. For detailed desription of handling, please see chapter >> **Management**.
