

4.54.0

Release Notes - Webdesk - Version 4.54.0

Zeiterfassung

- [[WD-15775](#)¹] - IF2SQL: Export accounts in the right format
- [[WD-16144](#)²] - IF2SQL should not export all persons if no person matching a clientPrefix filter was found
- [[WD-16241](#)³] - The dashboard for users without a TA-ID is always displayed when it's configured to be the start action
- [[WD-16247](#)⁴] - JournalV2: The combined export doesn't respect the data change (date interval) from the user
- [[WD-15976](#)⁵] - Add CSV export feature to Journal table
- [[WD-15978](#)⁶] - Implement a custom button to "Save PDF and CSV files from JournalForExternalSystem"
- [[WD-15979](#)⁷] - Replace the current button Present/Absent with two independent buttons in webdesk dashboard
- [[WD-16059](#)⁸] - Add CSV export options in the action config of ta_getJournalV2
- [[WD-15451](#)⁹] - Make IF2SQL export via job available in job logs
- [[WD-15633](#)¹⁰] - Add the "Show/Hide columns" feature to ta_getJournalV2 too
- [[WD-15748](#)¹¹] - Save state to action cache when changing columns visibility in JournalV2
- [[WD-15883](#)¹²] - Increase limit of timeCorrection intervals from 10 to 20
- [[WD-15908](#)¹³] - Persist absence reason settings in tacon.properties
- [[WD-16034](#)¹⁴] - Avoid blocking write operations while exporting to IF2SQL data warehouse

Projektzeiterfassung

- [[WD-14920](#)¹⁵] - Mobile editTimeEfforts month view - useless empty day-panel at bottom
- [[WD-16228](#)¹⁶] - TA-PTM Time Correction: Wrong working time calculation after deleting middle interval
- [[WD-16230](#)¹⁷] - TA-PTM Time Correction: Problem with overlapping intervals validation (from ptm_editTimeEfforts config)
- [[WD-16025](#)¹⁸] - TA-PTM Time Correction: Add option to calculate working time with the script

HR-Expert

- [[WD-15915](#)¹⁹] - Show proper validation error message in HRX's save button

UI/UX

- [[WD-15701](#)²⁰] - The progress info slides in from the left unexpectedly
- [[WD-15743](#)²¹] - Fixed table header on WdOrgTable is not adjusting to collapsed SideMenu
- [[WD-15780](#)²²] - New Edit Time efforts have broken bar
- [[WD-15961](#)²³] - Correction client mobile view: Remove zebra styling of day contents
- [[WD-16003](#)²⁴] - Journal V2 not showing well on mobile due to wrap issues

- [[WD-16172](#)²⁵] - JournalV2 mobile remove unnecessary space between day "header" and content
- [[WD-15251](#)²⁶] - Beautify the export button of the Journal v2

System

- [[WD-12888](#)²⁷] - Dynamic SameSite=none support for chrome
- [[WD-15026](#)²⁸] - Webdesk-installer fails to connect to sql-server Database on 4.48+
- [[WD-15888](#)²⁹] - NoSuchFieldExceptions when running hrPersonConnector
- [[WD-11185](#)³⁰] - New relation m:n between PoKeyValue and PoLegislation
- [[WD-13710](#)³¹] - Upgrade velocity dependency
- [[WD-15687](#)³²] - Move labor contract entity from HR to PO and assign to Legislation
- [[WD-15736](#)³³] - Improve password reset for client admins
- [[WD-16018](#)³⁴] - Support ndjson in PoRestEndpointJsonConnectorImpl
- [[WD-16023](#)³⁵] - Job to execute UserDataPreloader tasks in the night
