[WD-10844] - The navigation of the pagination is not working in dialog when saving daily program
[WD-10855] - Sorting order of weekly programs is wrong
[WD-10866] - On Organigram Page, the names are unaligned and not under the Role Title
[WD-10877] - Wrong date autocomplete in HRX
[WD-10889] - Exception when trying to create a travel folder
[WD-10914] - PostProcessHandler is not a function
[WD-10926] - Creating a new daily program throws an exception
[WD-10952] - Exception when using lazy loading for tree-table report
[WD-10978] - deleteOldWfData doesn't show all processes in log
[WD-10979] - deleteOldWfData can't close process instances because of DB constraints
[WD-10983] - Exception when clicking on Save and re-run daily accounting
[WD-10989] - Save dialog is displayed even if daily/weekly program is saved successfully
[WD-10990] - Avoid loading costly list of referenced process-definitions on open of wflist
[WD-10997] - Invalid data (out dated) problems when using the new Journal
[WD-11002] - JournalV2 does not load/shows nothing
[WD-11003] - Booking mask brings NPE when today has full-day-absence
[WD-11008] - JournalV2 does not load if no accounting column is defined
[WD-11009] - JournalV2 not all input fields shown adding accounting column
[WD-11012] - JournalV2 explort has some null entries when opening with Excel
[WD-11018] - JournalV2 today comments are not shown
[WD-11025] - JournalV2 holidays miss green background
[WD-11030] - Booking doesn't Appear in New Journal or rest/ta/journal Endpoint
[WD-11038] - Raise chache size to prevent timeouts from TACon
[WD-11063] - Saving Ta Client Data is way too slow <h2> New Feature</h2>
[<a href='https://extranet.workflow.at/

jira/browse/WD-10368'>WD-10368] - Entity specific cache management
[WD-10371] - Cache Infrastructure for Journal V2
[WD-10733] - Hr-Expert page access should be logged as webdesk actions <h2> Task</h2>
[WD-10511] - Create POJO to represent WfSimpleProcessDefinition and TaAbsenceEntrySimpleProcessDefinition
[WD-10512] - New method to find out which Absence Reasons a person can use, based on the process definitions it has permission to
[WD-10513] - New model that represents an Absence Reason with the process definition metadata bound to it
[WD-10514] - New TaAbsenceIntervalRestEndpoint
[WD-10515] - New TaAbsenceReasonRestEndpoint
[WD-10516] - Create new service WfSimpleProcessDefinitionService
[WD-10659] - Refactor and Improve Action Configuration model/services
[WD-10768] - System messages: make it possible to easily select multiple clients as system message target
[WD-10834] - Improvements for React Journal release
[WD-10859] - Refactor TaDefinitionStatisticsService, move methods to TaPersonService
[WD-10860] - Remove interfaces for the DAOs in TA and rename 6020 specific DAOs to ***6020DAO
[WD-10864] - Research integration of React components in HRX
[WD-10880] - Frontend Implementation of Lazy loading in TreeTableReports
[WD-11033] - Added and edited translations <h2> Improvement</h2>
[WD-900] - TreeTable Reports ajaxified (webdesk/cocoon version)
[WD-9944] - Time columns should have the same width in "Frame", "Breaks" and "Accounts"
[WD-9980] - Improve Journal V2 endpoint
[WD-9990] - Error handling when there is a problem during the fetch of data of Journal V2
[WD-10578] - Make keyFieldName dynamic in WdReportTable
[WD-10593] - Improve Mappings Tab for definitions
[WD-10644] - StreetAddress validation in Travel Expense
[WD-10680] - Daily Time-Model maintenance should check impact and provide option to create copy
[WD-10681] - Allow archiving of day- and week-programs
[WD-10722] - Make the competence target for Role assignment prefilled if the admin user just has one client
[WD-10759] - Add JS State-Management for webdesk pages client-side
[WD-10763] - Move help messages to the right side and prevent removing target time hours when changing client when creating a new weekly program
[WD-10845] - Show dialog to create a copy of weekly program if they are already used (assigned)
[WD-10852] - Checking translations and fixing text modules
[WD-10856] - Logging for the job deleteOldWfData
[WD-10887] - Improve performance and rendering time of react journal
[WD-10895] - Set a realistic minimum year by default for React WdInlineYearPicker
[<a href='https://extranet.workflow.at/jira/

browse/WD-10907'>WD-10907] - Decouple websdk version from module version
[WD-10920] - Show skeleton of the Journal containing the dates after loading the configuration
[WD-10923] - React Journal Excel Export
[WD-10931] - Make save dialog when editing daily program to be the same like in weekly program and move "used in weeks" to different tab
[WD-10936] - Add caching for TaAbsenceReasonService
[WD-10937] - Hide the search and the show/hide columns options if the lazy loading is enabled
[WD-10954] - Add lazy-loading functionality to rp_getOrgTreeTable.at and rp_getScriptedTreeTable.act
[WD-10959] - Add failOnError for TaUpdateAttendantBehaviorToAbsenceReason (v26)
[WD-11017] - Make react context menu use webdesk.open instead of href
