4.0.25

Bug

- [WD-1604[1]] - Validation errors in nested details-views for relation tables can not be handled correctly
- [WD-2205[2]] - Print buttons slide to the left in read-only mode
- [WD-5685[3]] - No Connection with Exchange2010: Timeout waiting for connections
- [WD-5733[4]] - Travel expense throws exception when adding files
- [WD-5749[5]] - Setting an effective termination date before its announce date should not be allowed as it is against the law
- [WD-5802[6]] - Synchronized Office Address is not updated when Location gets updated
- [WD-6199[7]] - Attach file causes a new line every time clicking next or trying to delete a row
- [WD-6236[8]] - executeAndStoreReports: in alfresco there is always the name of the first person in the person selection shown in parenthesis
- [WD-6285[9]] - Personal Calendar view in mobile view is broken
- [WD-6295[10]] - Projectchooser shows empty list when PtmOptions.initialListResultsLimit4ProjectChooser is too low
- [WD-6298[11]] - Action Icon Configuration - Position the preview closer to the input field where it is defined
- [WD-6308[12]] - Edit Client > Prefix Change Dialog > Close button does not work and keeps dialog in endless loop
- [WD-6320[13]] - Not possible to open dm_folderExplorer.act with personal admin account
- [WD-6343[14]] - Groupware hint (blue triangle) not shown anymore in configurations of ta_getOrgCalendar
- [WD-6370[15]] - Not possible to have more than one time correction in a time correction process
- [WD-6441[16]] - search field in search person action has help message icon in the middle of it
- [WD-6443[17]] - No more search functionality in fixed table header
- [WD-6450[18]] - Using Exchange 2016 implementation gives back a 401 unauthorised Error
- [WD-6453[19]] - Long descriptions do not get saved in stop-watch
- [WD-6458[20]] - Journeys sorted by type
- [WD-6465[21]] - Alignment of table cells is top but should be middle
- [WD-6478[22]] - Address validation in travel request / expense: validation message at wrong position causes issues
- [WD-6481[23]] - REST Webservies: wrong header is set
- [WD-6494[24]] - TravelExpense: estimated km via geocomplete plugin not refreshed when changing the address in tab kilometer allowances
- [WD-6538[25]] - Jumping between tabs in edit Person displays the "New employee form"
- [WD-6545[26]] - Setup Appraisal Interview on server personalwolke.at/webdesk3-test
- [WD-6551[27]] - Report definitions view is not loading due to wrong query in act-descr.xml
- [WD-6564[28]] - Access to action getLoginIInfos.do from ptm-kios-app fails
- [WD-6571[29]] - Regression: Project-effort unusable after choosing a project from the project-chooser dialog

- [WD-6577[30]] - Upgrade script for setting the configHash as varchar in the DB
- [WD-6578[31]] - Audit Log NullPointer triggered when trying to save project booking permission
- [WD-6579[32]] - ptm_doProjectTimeBooking unusable without Ta-Connector
- [WD-6587[33]] - NullPointerException when performing a person "Termination" without entering any data
- [WD-6588[34]] - NullPointerException from service when performing a person "Termination"
- [WD-6595[35]] - Title does not get updated after shortname and/or name was edited and saved
- [WD-6598[36]] - sadmin is locked after update and forced password change
- [WD-6608[37]] - Social security registration displays error message
- [WD-6618[38]] - IE: Columns in salary accounting table form are too narrow (regression caused by WD-6414?)
- [WD-6625[39]] - Deleting a person created today causes TaRuntimeException - NumberFormatException: null

Improvement

- [WD-4051[40]] - RecordKmBill - add field "KM-Abschlag"
- [WD-4947[41]] - On a new effort, a reasonable activity should be automatically chosen after selecting a project
- [WD-5840[42]] - TaPersonDAO Ta-Connector extension => change Start of Time-Recording to past
- [WD-6177[43]] - Make Default SalaryCode configurable in HrClientData
- [WD-6276[44]] - Intercept the event "browser window/tab closes" to prevent data-loss by a confirm-save dialog
- [WD-6376[45]] - Layouting in po_showDataTransferHistory.act
- [WD-6381[46]] - Run only 6020 unit tests in a 32-bit JVM
- [WD-6408[47]] - Force password change of Full-System-Admin
- [WD-6413[48]] - Folder Explorer: add configuration option to open navigation tree by default
- [WD-6414[49]] - Folder Explorer: improve width of column "Name"
- [WD-6475[50]] - Do not select a relation table row initially when no details-panel is visible for it
- [WD-6490[51]] - After a successful password update clicking "Open application" does just that without again asking for authentication
- [WD-6491[52]] - Login Dialog: Hide section "Requirements to password security" if no such policy is defined
- [WD-6509[53]] - Tweak dataSources.xml to use environment variables
- [WD-6558[54]] - Delete Person-related data in RS-module
- [WD-6585[55]] - Display key of the PoKeyValueType in comment selection box

New Feature

- [WD-6355[56]] - Social Security Deregistration workflow integration
- [WD-6372[57]] - Implementation of building blocks for the pseudonymization service
- [WD-6503[58]] - Display change-log information in HRX forms

Task

- [WD-2285[59]] - Make Cocoon 2.2 compatible with Spring 4.2 and Java 8
- [WD-6007[60]] - Rest-Service default serialization
- [WD-6234[61]] - Fix Selenium test bugs in HR-Expert
- [WD-6361[62]] - Login on Kiosk-App
- [WD-6363[63]] - PTM-Kiosk: Get the latest running effort and display it
- [WD-6364[64]] - Get the bookable projects for the current user
- [WD-6385[65]] - Table columns are not aligned in Edge
- [WD-6442[66]] - po_searchPerson: add help message and webdesk application context to velocity script field
- [WD-6488[67]] - Merge Delete and EditDelete Icons in Webdesk/Cocoon
- [WD-6497[68]] - Kiosk App: Setup Demo Client: Projects bookable per users
- [WD-6506[69]] - Unit test watching
- [WD-6514[70]] - Vaadin session-lock assertion error when directly inputting a browser address with an UID
- [WD-6557[71]] - UX pattern to toggle between All and a custom Selection set
- [WD-6581[72]] - Show error messages on unsuccessful save and do not allow to add rescheduling in the past

Sub-task

- [WD-6368[73]] - Make process definition available for social security deregistration
- [WD-6369[74]] - Create configuration for social security deregistration
