

# Job getAbsenceTextModules

Der Job "Get Absence Text Modules" hat die Aufgabe, Textbausteine für alle Fehlgründe im Zeitwirtschaftssystem zu erstellen, allerdings nur für die voreingestellte Sprache.

The screenshot shows a web-based configuration interface for a job. At the top, there is a header with a clock icon and the word 'Job'. Below this is a navigation bar with four buttons: 'Speichern', 'Speichern & Schließen', 'Zurück', and 'Job starten'. The main configuration area is divided into two sections. The first section contains three fields: 'Name' with the value 'getAbsenceTextModules', 'Aktiv' with a dropdown menu set to 'Nein', and 'Beschreibung' with a text area containing the text 'generates Textmodules for all the AbsenceReasons inside the TA System. (but only for the default language!)'. The second section is titled 'Trigger' and contains a table with three columns: 'Zeitplan Typ', 'Einstellungen', and 'Löschen'. The first row shows 'Täglicher Trigger' in the first column, 'Stunde 20' and 'Minute 00' in the second column, and an unchecked checkbox in the third column. Below this table is a section titled 'Neuer Trigger' with a dropdown menu set to 'Nichts gewählt'.

Eine detaillierte Beschreibung zu den allgemeinen Job-Parametern finden Sie im Kapitel **Jobs**.
