

## 4.11.0

Release Notes - Webdesk - 16.07.2020

---

### Bug

- [[WD-10957](https://extranet.workflow.at/jira/browse/WD-10957)<sup>1</sup>] - Leaf elements should not have number as first column
- [[WD-11031](https://extranet.workflow.at/jira/browse/WD-11031)<sup>2</sup>] - Travel expense only shows region one day after region validity start
- [[WD-11123](https://extranet.workflow.at/jira/browse/WD-11123)<sup>3</sup>] - Summary value for account when using normal time is invalid
- [[WD-11124](https://extranet.workflow.at/jira/browse/WD-11124)<sup>4</sup>] - Columns in ta\_getOrgJournal client-side report are not aligned in accordance with the action config
- [[WD-11158](https://extranet.workflow.at/jira/browse/WD-11158)<sup>5</sup>] - RecordSpecial names containing a colon will not work correctly for getOrgTravel reports
- [[WD-11172](https://extranet.workflow.at/jira/browse/WD-11172)<sup>6</sup>] - Org action handler test: Table not displayed
- [[WD-11311](https://extranet.workflow.at/jira/browse/WD-11311)<sup>7</sup>] - Unarchiving Timemodels puts them at the end of the sorting order in lists
- [[WD-11363](https://extranet.workflow.at/jira/browse/WD-11363)<sup>8</sup>] - Split up the button labels of archiving and activating buttons for daily and weekly programs

### New Feature

- [[WD-6755](https://extranet.workflow.at/jira/browse/WD-6755)<sup>9</sup>] - Additional dynamic fields need to be assignable to a set of clients
- [[WD-10012](https://extranet.workflow.at/jira/browse/WD-10012)<sup>10</sup>] - Integrate Matomo into HRX Vaadin application

### Task

- [[WD-11041](https://extranet.workflow.at/jira/browse/WD-11041)<sup>11</sup>] - Legislation Improvements
- [[WD-11057](https://extranet.workflow.at/jira/browse/WD-11057)<sup>12</sup>] - Fix Jest tests on webdesk-ta-websdk
- [[WD-11118](https://extranet.workflow.at/jira/browse/WD-11118)<sup>13</sup>] - Remove cocoon dependency from JSON providers for react-report table
- [[WD-11198](https://extranet.workflow.at/jira/browse/WD-11198)<sup>14</sup>] - I18n Fix For Legislation Master Data

### Improvement

- [[WD-11050](https://extranet.workflow.at/jira/browse/WD-11050)<sup>15</sup>] - Allow embedded database for dockerized webdesk by setting environment variable
- [[WD-11051](https://extranet.workflow.at/jira/browse/WD-11051)<sup>16</sup>] - In der Aktionskonfiguration kann nun eingestellt werden, dass die Anzeige im Frontend gerendert wird.
- [[WD-11141](https://extranet.workflow.at/jira/browse/WD-11141)<sup>17</sup>] - Improve NPM build artifacts
