4.18.0

Release Notes - Webdesk - Version 4.18.0

Bug

- [WD-11664[1]] - Avoid NPE when opening ptm_editTimeEfforts.act with TA integration but no running TA connector
- [WD-11808[2]] - GetOrgJournal: Header displays "Invalid date - Invalid date"
- [WD-11823[3]] - Client side report javascript column does not calculate value for every row individually
- [WD-11883[4]] - Missing Pagination in list of system messages
- [WD-11958[5]] - Preloading images should not block application
- [WD-11975[6]] - Error when opening start Page with react journal
- [WD-11980[7]] - EditLegislation dependency bugs and missing success message
- [WD-12010[8]] - Error when switching back to initial user
- [WD-12015[9]] - Exception when opening calendar with GraphAPI GW
- [WD-12019[10]] - User can filter for ANY client in po_showExternalAPIs
- [WD-12047[11]] - Hide External API panel from user settings if there are none to configure
- [WD-12053[12]] - Graph API does not work with correct PoOptions.webdeskURL parameter
- [WD-12054[13]] - Unable to delete External API if its already in use
- [WD-12055[14]] - Error when opening calendar with MS Graph API
- [WD-12060[15]] - Exception thrown when opening calendar without using ExternalAPI when one is available
- [WD-12061[16]] - FreeBusy column does not work with MS GraphAPI
- [WD-12063[17]] - Opening calendar fails due to incorrect client secret when using Graph API
- [WD-12067[18]] - IllegalStateException: No time zones information for <username>
- [WD-12080[19]] - Exception when opening Calendar with specific event
- [WD-12081[20]] - Exception when opening Calendar with a person not using GW
- [WD-12085[21]] - Do a validation when saving a PoExternalAPI instead of throwing an exception
- [WD-12093[22]] - Exception when running the job SyncCalendarDates
- [WD-12095[23]] - NPE when opening userSettings and PoOptions.webdeskURL is null

New Feature

- [WD-11461[24]] - Attendance Tableau: Groupware appointments React Component
- [WD-11463[25]] - Attendance Tableau: Person "Card" React Component
- [WD-11504[26]] - Implement column sorting in WdTable
- [WD-11514[27]] - Implementation of GwCalendarService using MS GraphAPI
- [WD-11515[28]] - Implementation of GwUtilService using MS GraphAPI
- [WD-11516[29]] - Store a user's login token coming from an OAuth authentication process of some service
- [WD-11595[30]] - Absence-Entry calculation of absencereason specific open days (f.i. Home Office) - MCE

- [WD-11893[31]] - Write test cases for extension of timelines with share and type relations

Task

- [WD-11073[32]] - Devops: tests are not running on webdesk-xx-webclient projects
- [WD-11492[33]] - Move ShowComponentWrapper + Tabs from testReact po action to public components
- [WD-11512[34]] - Image Component: use Dyna Image to render image with correct dimensions
- [WD-11800[35]] - POC for export React Table from Server
- [WD-11831[36]] - EVM Websdk project
- [WD-11832[37]] - Base Restendpoints and Typescript webdsk Services for event masterdata
- [WD-11833[38]] - PoC for Communication MVP <-> React
- [WD-11842[39]] - ReservationRow React component
- [WD-11878[40]] - Change german i18n for group in Organisation/groups tab
- [WD-11939[41]] - EVM WebSDK tests
- [WD-11978[42]] - Test-Jars are not deployed to obelix-dev and obelix-release
- [WD-11979[43]] - Run Jenkins CI Maven builds in parallel
- [WD-12051[44]] - Translation for MS Graph Impl

Improvement

- [WD-11464[45]] - Add Personalwolke logo to BIRT reports
- [WD-11801[46]] - GetOrgJournal: Display table skeleton while waiting for the data
- [WD-11821[47]] - Missing Fields in HrPositionConnector
- [WD-11845[48]] - testAction for react components within EVM
- [WD-11879[49]] - Enhance Evm Roomsearch to also return partial and non fitting results
- [WD-11880[50]] - Tablemanagement component/container
- [WD-11937[51]] - Provide list of most used resource groups
- [WD-12008[52]] - Make "Integrations" selection in user settings not mandatory
- [WD-12076[53]] - Improve error message in HrPerformEmploymentTerminations job
- [WD-12082[54]] - Provide access for "redirectWorkflowId" in the JS validation for process definitions

Sub-task

- [WD-11762[55]] - UI for authorizing a new external service integration in the user's settings
- [WD-11763[56]] - UI for showing/editing external API integrations
- [WD-11793[57]] - New endpoint to confirm a successful external API integration
