

## 4.5.51

Release Notes - Webdesk - Version 4.5.51 <h2> Bug</h2><ul><li>[<a href='https://extranet.workflow.at/jira/browse/WD-10088'>WD-10088</a>] - doRescheduling page: weekly interval mode has a duplicated table column which appears only on IE</li><li>[<a href='https://extranet.workflow.at/jira/browse/WD-10534'>WD-10534</a>] - Problems with collapsed columns on React Table</li><li>[<a href='https://extranet.workflow.at/jira/browse/WD-10744'>WD-10744</a>] - Bundle Tomcat version 8.5.47 in installer</li><li>[<a href='https://extranet.workflow.at/jira/browse/WD-10750'>WD-10750</a>] - Pagination missing in ta\_showAbsenceReasons.act</li><li>[<a href='https://extranet.workflow.at/jira/browse/WD-10761'>WD-10761</a>] - PDF/XSLX-Export on mobile not working with JS based implementation</li><li>[<a href='https://extranet.workflow.at/jira/browse/WD-10767'>WD-10767</a>] - ta\_getGroupCalender: Make query-validation into the past relative from today working again</li><li>[<a href='https://extranet.workflow.at/jira/browse/WD-10822'>WD-10822</a>] - NullPointer Mappings Creating Empty TravelType KmBillingsDefinition</li><li>[<a href='https://extranet.workflow.at/jira/browse/WD-10827'>WD-10827</a>] - Mapping Widget Person and Group isn't Validated</li><li>[<a href='https://extranet.workflow.at/jira/browse/WD-10835'>WD-10835</a>] - Exception EditClient Travel Management Module</li><li>[<a href='https://extranet.workflow.at/jira/browse/WD-10844'>WD-10844</a>] - The navigation of the pagination is not working in dialog when saving daily program</li><li>[<a href='https://extranet.workflow.at/jira/browse/WD-10855'>WD-10855</a>] - Sorting order of weekly programs is wrong</li><li>[<a href='https://extranet.workflow.at/jira/browse/WD-10866'>WD-10866</a>] - On Organigram Page, the names are unaligned and not under the Role Title</li><li>[<a href='https://extranet.workflow.at/jira/browse/WD-10877'>WD-10877</a>] - Wrong date autocomplete in HRX</li><li>[<a href='https://extranet.workflow.at/jira/browse/WD-10889'>WD-10889</a>] - Exception when trying to create a travel folder</li><li>[<a href='https://extranet.workflow.at/jira/browse/WD-10914'>WD-10914</a>] - PostProcessHandler is not a function</li><li>[<a href='https://extranet.workflow.at/jira/browse/WD-10926'>WD-10926</a>] - Creating a new daily program throws an exception</li><li>[<a href='https://extranet.workflow.at/jira/browse/WD-10952'>WD-10952</a>] - Exception when using lazy loading for tree-table report</li><li>[<a href='https://extranet.workflow.at/jira/browse/WD-10978'>WD-10978</a>] - deleteOldWfData doesn't show all processes in log</li><li>[<a href='https://extranet.workflow.at/jira/browse/WD-10979'>WD-10979</a>] - deleteOldWfData can't close process instances because of DB constraints</li><li>[<a href='https://extranet.workflow.at/jira/browse/WD-10983'>WD-10983</a>] - Exception when clicking on Save and re-run daily accounting</li><li>[<a href='https://extranet.workflow.at/jira/browse/WD-10989'>WD-10989</a>] - Save dialog is displayed even if daily/weekly program is saved successfully</li><li>[<a href='https://extranet.workflow.at/jira/browse/WD-10990'>WD-10990</a>] - Avoid loading costly list of referenced process-definitions on open of wflist</li><li>[<a href='https://extranet.workflow.at/jira/browse/WD-10997'>WD-10997</a>] - Invalid data (out dated) problems when using the new Journal</li><li>[<a href='https://extranet.workflow.at/jira/browse/WD-11002'>WD-11002</a>] - JournalV2 does not load/shows nothing</li><li>[<a href='https://extranet.workflow.at/jira/browse/WD-11003'>WD-11003</a>] - Booking mask brings NPE when today has full-day-absence</li><li>[<a href='https://extranet.workflow.at/jira/browse/WD-11008'>WD-11008</a>] - JournalV2 does not load if no accounting column is defined</li><li>[<a href='https://extranet.workflow.at/jira/browse/WD-11009'>WD-11009</a>] - JournalV2 not all input fields shown adding accounting column</li><li>[<a href='https://extranet.workflow.at/jira/browse/WD-11012'>WD-11012</a>] - JournalV2 exploit has some null entries when opening with Excel</li><li>[<a href='https://extranet.workflow.at/jira/browse/WD-11018'>WD-11018</a>] - JournalV2 today comments are not shown</li><li>[<a href='https://extranet.workflow.at/jira/browse/WD-11025'>WD-11025</a>] - JournalV2 holidays miss green background</li><li>[<a href='https://extranet.workflow.at/jira/browse/WD-11030'>WD-11030</a>] - Booking doesn't Appear in New Journal or rest/ta/journal Endpoint</li><li>[<a href='https://extranet.workflow.at/jira/browse/WD-11038'>WD-11038</a>] - Raise cache size to prevent timeouts from TACon</li><li>[<a href='https://extranet.workflow.at/jira/browse/WD-11063'>WD-11063</a>] - Saving Ta Client Data is way too slow</li></ul> <h2> New Feature</h2><ul><li>[<a href='https://extranet.workflow.at/'

jira/browse/WD-10368'>WD-10368</a>] - Entity specific cache management</li><li>[<a href='https://extranet.workflow.at/jira/browse/WD-10371'>WD-10371</a>] - Cache Infrastructure for Journal V2</li><li>[<a href='https://extranet.workflow.at/jira/browse/WD-10733'>WD-10733</a>] - Hr-Expert page access should be logged as webdesk actions</li></ul> <h2> Task</h2><ul><li>[<a href='https://extranet.workflow.at/jira/browse/WD-10511'>WD-10511</a>] - Create POJO to represent WfSimpleProcessDefinition and TaAbsenceEntrySimpleProcessDefinition</li><li>[<a href='https://extranet.workflow.at/jira/browse/WD-10512'>WD-10512</a>] - New method to find out which Absence Reasons a person can use, based on the process definitions it has permission to</li><li>[<a href='https://extranet.workflow.at/jira/browse/WD-10513'>WD-10513</a>] - New model that represents an Absence Reason with the process definition metadata bound to it</li><li>[<a href='https://extranet.workflow.at/jira/browse/WD-10514'>WD-10514</a>] - New TaAbsenceIntervalRestEndpoint</li><li>[<a href='https://extranet.workflow.at/jira/browse/WD-10515'>WD-10515</a>] - New TaAbsenceReasonRestEndpoint</li><li>[<a href='https://extranet.workflow.at/jira/browse/WD-10516'>WD-10516</a>] - Create new service WfSimpleProcessDefinitionService</li><li>[<a href='https://extranet.workflow.at/jira/browse/WD-10659'>WD-10659</a>] - Refactor and Improve Action Configuration model/services</li><li>[<a href='https://extranet.workflow.at/jira/browse/WD-10768'>WD-10768</a>] - System messages: make it possible to easily select multiple clients as system message target</li><li>[<a href='https://extranet.workflow.at/jira/browse/WD-10834'>WD-10834</a>] - Improvements for React Journal release</li><li>[<a href='https://extranet.workflow.at/jira/browse/WD-10859'>WD-10859</a>] - Refactor TaDefinitionStatisticsService, move methods to TaPersonService</li><li>[<a href='https://extranet.workflow.at/jira/browse/WD-10860'>WD-10860</a>] - Remove interfaces for the DAOs in TA and rename 6020 specific DAOs to \*\*\*6020DAO</li><li>[<a href='https://extranet.workflow.at/jira/browse/WD-10864'>WD-10864</a>] - Research integration of React components in HRX</li><li>[<a href='https://extranet.workflow.at/jira/browse/WD-10880'>WD-10880</a>] - Frontend Implementation of Lazy loading in TreeTableReports</li><li>[<a href='https://extranet.workflow.at/jira/browse/WD-11033'>WD-11033</a>] - Added and edited translations</li></ul> <h2> Improvement</h2><ul><li>[<a href='https://extranet.workflow.at/jira/browse/WD-900'>WD-900</a>] - TreeTable Reports ajaxified (webdesk/cocoon version)</li><li>[<a href='https://extranet.workflow.at/jira/browse/WD-9944'>WD-9944</a>] - Time columns should have the same width in "Frame", "Breaks" and "Accounts"</li><li>[<a href='https://extranet.workflow.at/jira/browse/WD-9980'>WD-9980</a>] - Improve Journal V2 endpoint</li><li>[<a href='https://extranet.workflow.at/jira/browse/WD-9990'>WD-9990</a>] - Error handling when there is a problem during the fetch of data of Journal V2</li><li>[<a href='https://extranet.workflow.at/jira/browse/WD-10578'>WD-10578</a>] - Make keyFieldName dynamic in WdReportTable</li><li>[<a href='https://extranet.workflow.at/jira/browse/WD-10593'>WD-10593</a>] - Improve Mappings Tab for definitions</li><li>[<a href='https://extranet.workflow.at/jira/browse/WD-10644'>WD-10644</a>] - StreetAddress validation in Travel Expense</li><li>[<a href='https://extranet.workflow.at/jira/browse/WD-10680'>WD-10680</a>] - Daily Time-Model maintenance should check impact and provide option to create copy</li><li>[<a href='https://extranet.workflow.at/jira/browse/WD-10681'>WD-10681</a>] - Allow archiving of day- and week-programs</li><li>[<a href='https://extranet.workflow.at/jira/browse/WD-10722'>WD-10722</a>] - Make the competence target for Role assignment prefilled if the admin user just has one client</li><li>[<a href='https://extranet.workflow.at/jira/browse/WD-10759'>WD-10759</a>] - Add JS State-Management for webdesk pages client-side</li><li>[<a href='https://extranet.workflow.at/jira/browse/WD-10763'>WD-10763</a>] - Move help messages to the right side and prevent removing target time hours when changing client when creating a new weekly program</li><li>[<a href='https://extranet.workflow.at/jira/browse/WD-10845'>WD-10845</a>] - Show dialog to create a copy of weekly program if they are already used (assigned)</li><li>[<a href='https://extranet.workflow.at/jira/browse/WD-10852'>WD-10852</a>] - Checking translations and fixing text modules</li><li>[<a href='https://extranet.workflow.at/jira/browse/WD-10856'>WD-10856</a>] - Logging for the job deleteOldWfData</li><li>[<a href='https://extranet.workflow.at/jira/browse/WD-10887'>WD-10887</a>] - Improve performance and rendering time of react journal</li><li>[<a href='https://extranet.workflow.at/jira/browse/WD-10895'>WD-10895</a>] - Set a realistic minimum year by default for React WdInlineYearPicker</li><li>[<a href='https://extranet.workflow.at/jira/

browse/WD-10907'>WD-10907</a>] - Decouple websdk version from module version</li><li>[<a href='https://extranet.workflow.at/jira/browse/WD-10920'>WD-10920</a>] - Show skeleton of the Journal containing the dates after loading the configuration</li><li>[<a href='https://extranet.workflow.at/jira/browse/WD-10923'>WD-10923</a>] - React Journal Excel Export</li><li>[<a href='https://extranet.workflow.at/jira/browse/WD-10931'>WD-10931</a>] - Make save dialog when editing daily program to be the same like in weekly program and move "used in weeks" to different tab</li><li>[<a href='https://extranet.workflow.at/jira/browse/WD-10936'>WD-10936</a>] - Add caching for TaAbsenceReasonService</li><li>[<a href='https://extranet.workflow.at/jira/browse/WD-10937'>WD-10937</a>] - Hide the search and the show/hide columns options if the lazy loading is enabled</li><li>[<a href='https://extranet.workflow.at/jira/browse/WD-10954'>WD-10954</a>] - Add lazy-loading functionality to rp\_getOrgTreeTable.act and rp\_getScriptedTreeTable.act</li><li>[<a href='https://extranet.workflow.at/jira/browse/WD-10959'>WD-10959</a>] - Add failOnError for TaUpdateAttendantBehaviorToAbsenceReason (v26)</li><li>[<a href='https://extranet.workflow.at/jira/browse/WD-11017'>WD-11017</a>] - Make react context menu use webdesk.open instead of href</li></ul>
