

## 4.1.13

Release Notes - Webdesk - Version 4.1.13

---

### Bug

- [[WD-8207](#)<sup>1</sup>] - Wrong holiday entitlement calculated for vacation requests that end on the day the yearly entitlement is added
- [[WD-8208](#)<sup>2</sup>] - NumberFormatException when using char field in 6020 for number of vacation days
- [[WD-8209](#)<sup>3</sup>] - Displaying of vacation entitlement table in vacation request is only calculated when the to date is changed
- [[WD-8213](#)<sup>4</sup>] - Time corrections on days with an open booking interval should only close the booking interval if the timecorrection is within the open interval
- [[WD-8220](#)<sup>5</sup>] - Workflow-List: show confirmation dialog on button cancel

### Task

- [[WD-8218](#)<sup>6</sup>] - Show package and process id in selection list configuration (wf\_getOrgProcessInstances)

### Improvement

- [[WD-8052](#)<sup>7</sup>] - TaCheckMaxWorkingTime: make it possible to use velocity scripts in mailbody
- [[WD-8173](#)<sup>8</sup>] - po\_editUserSettings: make it possible to define the maximum validity of deputy assignments
- [[WD-8214](#)<sup>9</sup>] - Add method getRecordSpecialsAmountPaidByCompanyOfType(String commaSepeatedList) in TmTravelDecorator
